SUMMARY

Recent Computer Science graduate with Software Engineering internship experience in developing cloud-native web applications using Java, React, Next.js, Node.js, REST APIs, Docker, and SQL. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and full-stack development, with experience building scalable, production-ready software in Agile environments.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

2022 - 2026

Atria Institute of Technology, Bengaluru (Affiliated to Visvesvaraya Technological University – VTU)

- CGPA: 8.5/10, Relevant Courses: DSA, OOP, DBMS, Software Engineering, Web Development, AI/ML etc.

WORK EXPERIENCE

Software Engineer Intern

Feb 2026-May 2026

HostUp Cloud Technologies Pvt. Ltd.(Bengaluru)

- Developed cloud-native Next.js applications with authentication, billing, ticketing, reducing page load times by 35%.
- Implemented Docker containers for consistent application deployment cutting bugs by 25%.
- Configured cloud infrastructure, including VPCs, subnets, and security groups, reducing setup time by 60%.
- Collaborated on DevOps practices, reducing post-deployment issues by 30% and enhancing production systems.

PROJECT

Artificial Intelligence machine learning for improving Glycemic control in Diabetes

Tech Stack: Python, NumPy, Scikit-learn, Classification Algorithms, Model Evaluation, Pandas

- Built a Random Forest model achieving 89% accuracy for diabetes condition classification.
- Implemented an efficient ML pipeline with feature selection, generating predictions in under 100 ms.

Genetic Algorithm University Class Scheduler

Tech Stack: FastAPI, MongoDB, React (TypeScript), OR-Tools

- Architected an AI-powered scheduler using Genetic Algorithms and OR-Tools, achieving 92% satisfaction.
- Created scalable full-stack platform generating optimized timetables in ~200 500ms per request, supporting concurrent users, real-time updates, with JWT authentication and Google Gemini.

Modern Blog

Tech Stack: Next.js, React.js, Node.js, TypeScript, MongoDB(Prisma), API, Bun

- Engineered a full-stack blog platform using Next.js and MongoDB with ~90–95% functional accuracy in CRUD operations.
- Optimized scalable Next.js architecture with REST APIs, authentication, and feature expansion, achieving fast response times of ~150–300 ms.

SKILLS

Languages: Java, JavaScript, TypeScript, Python, HTML5, CSS3, XML

Frameworks: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap, BetterAuth, Hibernate

Databases: MongoDB, MySQL, NoSQL, Prisma

DevOps & Tools: Docker, Kubernetes, Git, GitHub, Linux, VS Code, CI/CD

Fundamentals: DSA, OOP, DBMS, Operating Systems, Multithreading, REST APIs, JWT Authentication,

Specializations: AI/ML, Cyber Security, Data Analytics, Cloud Computing, Computer Networks

CERTIFICATES

- [Cyber Security](#), [Data Analytics](#) - Deloitte
- [DSA with Java](#), Web Development - Apna College
- [Python Foundation](#) - Infosys

ACHIEVEMENTS

- Co-authored Scopus-indexed blockchain voting research, accepted for presentation at ICETSE 2025.
- Published AI research on diabetes, accepted for publication in Gradiiva Review Journal.
